SUMMARY

Having a passion for computers has led me to expand my knowledge in computer science from a young age.
I was absolutely attracted to computer software and games which later developed into an interest in programming.

I am mostly self-taught, as well as having a fundamental license degree in computer science from the Higher Institute of Computer Science of Mahdia.
I also have some experience developing mobile and web applications as a freelancer.

SKILLS

Machine Learning & AI	Computer Vision	SQL
MongoDB	Firebase	Mobile development (Flutter)
Flask	Data Structure and Algorithms	

EXPERIENCE

Python Developer

Freelance

📅 2019 - Ongoing

- Modified existing software to correct coding errors, upgrade and improve overall performance
- Implimented simple machine learning algorithms (Linear Regression, Decision tree,Random forest)
- Implimented inceptionV3 model for face shape classification (end of studies project)
- Implimented OpenCV and mediapipe for extracting face landmarks (end of studies project)

Flutter Developer

Freelance

📅 2021 - Ongoing

- Modified existing projects to correct coding errors, upgrade and improve overall performance
- Implementation of Firebase
- Design and developed 2 apps
- Integration/Widget/Unit Testing

PROGRAMMING

Python
Proficient
●●●●○

Dart
Advanced
●●●○○

JavaScript
